

The Neuroethics of Pain Medicine

UNDERSTANDING THE MORAL AND PRACTICAL ROLES AND RESPONSIBILITIES IN PAIN CARE

“Professor Giordano’s work aptly illustrates—and reinforces—the synthesis of neuroscience, philosophy, ethics and clinical care that cannot, nor should not, be separated.”

*—Edmund D. Pellegrino, MD
Chair, President’s Council on Bioethics, and
Professor Emeritus, Georgetown University Medical Center*

In this collection of deeply insightful essays, neuroscientist and ethicist James Giordano navigates the medical, philosophical, moral, ethical and legal landscape that constitutes pain care.

- Understanding pain as symptom, disorder and illness
- Intractable pain and the responsibilities of care
- Chronic pain and substance abuse as spectrum disorder
- Ethical considerations of the placebo effect
- Use of information and knowledge of pain management in right and good care
- The practical and moral basis and responsibilities of pain research
- Moral agency, character, intentions and actions of the pain practitioner
- The moral community of the physician and patient in pain medicine
- Morality and market forces in the practice of pain medicine

PAIN: MIND, MEANING, AND MEDICINE

By James Giordano

Paperback; 180 pages

ISBN-13:9780615295770; \$24.95

PPM Communications, Inc. ©2009

“Despite recent progress in the brain sciences, pain remains something of an enigma. In many ways the problem of pain reflects the hard questions that surround the nature of consciousness, the mind, and the meaning of the self, sentience and suffering...”

—James Giordano
